Graphics: DirectX 9 Compatible - Nvidia Geforce 6600 / ATI Radeon X1600 or faster with Shader Model 3 and 256 MB VRAM

Storage: 10 GB available space

English,French,Italian,German,Czech

I was given this DLC for pre-ordering which came bundled free, I've played over a good few hours with these buildings and they are an epic expansion to the game with the majority of the tier 1 to 4-5 having 4 square plot buildings which is great to have when you tend to want to fill up as much land with as much buildings for rent + reproduction as you can, this adds to the experience of the game with more building packs being introduced in the future, according to their official facebook page + news on steam and twitter.

I'd say buy it if you are really into constructor and want to strategize your purchased plots of land and for fast builder tier building as they tend to be built in a fraction of the time vs normal non-dlc buildings.

The choice is completely up to you and I recommend it.
