I dig a lot about this game, but it has numerous flaws.

First the good

- The game does a good job with setting. I found myself wanting to learn more about the people you interact with.
- The main character disagrees with me on that, they made him a jerk which really works
- The visuals and music go quite a bit on setting tone
- No really you play someone terrible and it may make you feel really awful.

And here's what's holding it back

- What you're trying to get to isn't clear. There are some hints that certainly took me in the wrong direction. The internal guide could be more clear about that.
- It can get pretty tedious. You're doing pretty much the same thing over and over again for hours. I would have liked if we could do more with the towns people. Even if it's more just being a jerk to them.
- Quite predictable ending. To the point I felt like it undermined what I was doing. Your mileage may vary on that one though. (Trying not to spoil). Meh. May be worth it for 1€ and you have nothing better to do in ~2 hours of your life.

- Lamer story than the first one, if that's possible, but I guess more effort was put into the dialog. It still feels like it was written by a 12 year old kid.
- Better engine than the first game.
- Less forced grind without any story progress than the first game, however this is accomplished by you being assaulted by enemies so frequently.
- Really short. Feels rushed.
- Not much in the way of level progression or item progression, and my characters had way fewer skills & spells than the first game.
- Extremely easy to beat.

. this bomberman mirror is fun!. Uniball is a great game that offers a simple concept and gameplay that is surprisingly difficult to master.

Is this the game for you?

---

If you are up for a challenge and appreciate a game that requires teamwork and precision.

Who is it not for?

Those that desire flashy graphics and instant gratification.. A very recommendable DLC for the game. Not necessarily as a first purchase if it's unclear if you like the base game. This game is not for everyone so a little caveat here...

However if you put some hours into the game then the plane selection you get from this DLC is worth it.

Note: Triwing Vintage is the most special plane in the game. Mastering it - especially for MP games is a bit of a challenge itself. Sparrow and Vanguard are good additions and give you more choice for certain levels.

---

When I've first tried it was really hard and stopped playing with it. After updates the game balanced properly. It provides fun and challenge at the same time. It's a must have Mario clone.. Awesome brick breaker game, simple but addictive gameplay, powerups, nice music and top-notch pixel art! Great fun alone or in local coop mode! It's only 1,99€ - get it now!

3A[?][?][?][?][?][?]. Such a Good Game :D Good for those who find Science Interesting. **The save issue has been fixed!**  
**Enjoy this great simulation game and let's start create a beautiful Fireworks!!**

**I really like this simulator game, it's fun, but currently the save system in the game is bugged!**  
**You might lost your progress just like how I lost my 5 hours progress.**

**I hope they get it fixed soon, until then play at your own risk.**

**Anyway, here's my piece**
